

I am writing this in support of my local community radio station KPJE, serving the communities of Dallas, Falls City, Monmouth and other areas of the central Willamette Valley in Oregon. I urge you to clear the barriers which may cause us to lose our radio station. I know that big business and those who "have" often get the better of those that "have not". Our community radio station provides it's listeners a service only they can provide. This radio station was eager to provide a voice for me and other cancer survivors to promote the American Cancer Society's Relay for Life fundraiser. The entertainment and unique programming provide us with a great alternative to "canned" radio. Please consider ruling in favor of the small stations and provide room on the dial for them to continue to serve their communities. Thanks Rick Bennett
